

Flocking templates: light chamber and pressure plate

Infidex 176 V x IDENTIDEM.design remix. Fits the one-piece and the two-piece body.
Print at 100% ("Actual size", no fit to page), then check the 50 mm bar before cutting.
Sizes allow 0.5 mm flocked paper and 0.2 mm fitting clearance per edge. T, B, R1 and R2 are narrower than the chamber so they sit between the side pieces. Every piece is symmetric, so either side can face up.
Fit order: S (both), then T and B, then R1 and R2. Leave the film gate opening and its throat bare.
P goes on the film face of the platen, centred, with 0.2 mm of platen showing all round.

 50 mm: measure this before cutting

Piece	Qty	Where
T	1	Chamber ceiling, tab towards the lens 70.60 x 23.53 mm, dxf/chamber-top.dxf
B	1	Chamber floor, tab towards the lens 70.60 x 23.28 mm, dxf/chamber-bottom.dxf
S	2	Left and right chamber walls 20.78 x 39.20 mm, dxf/chamber-side.dxf
R1	1	Rear wall below the film gate (optional) 70.60 x 9.10 mm, dxf/rear-wall-lower.dxf
R2	1	Rear wall above the film gate (optional) 70.60 x 4.75 mm, dxf/rear-wall-upper.dxf
P	1	Pressure plate, on the platen face 77.08 x 32.63 mm, dxf/pressure-plate.dxf
